Boost your Memory with Patented Exclusive Ingredients

Have you ever heard about “memory drinks”?... With the latest growing "baby boomer" generation, scientists are now looking into the area of brain health for smart drinks.

Our memory drinks contain natural ingredients (Intelectol®, Vincagenol®, Oxopocetine®) that help the improvement of symptoms associated with mental health. These compounds have been used in more than 50 countries as cerebral metabolism activators for the treatment of cognitive disorders of elderly people. Presently, after years of clinical studies, it has been demonstrated that in combination with coffee, tea and cola drinks, can provoke a synergistic increase in memory, with a more intense effect in young people. (Patent N° US 6,290,994 B1 - Beverage containing Caffeine or Theobromine and Vinpocetine Citrate for Stimulating Cerebral Activity)*

The New Era of the Functional Beverage is now a complete reality with potential enhancement of intelligence, memory, strength and vitality. The Memory Secret Company has created a revolutionary new formulation of herbals with Vinca extracts, able to expand functional capabilities of the body and mind. In order to elaborate a finished beverage form, we want to collaborate with companies that are now producing beverages such as cola, tea, coffee, etc. to prepare what we called “The Memory Drinks”. We offer the concept, and we have the necessary patents and trademarks, MemoCola®, MemoCafe®, MemoTea®, MemoCao®, MemoWater®... We consider to develop a drink as the first step, and to distribute this functional beverage through strong distribution networks as the second step. All is available to anyone interested in the manufacturing, packaging, distribution and marketing of the products. We offer multiple business opportunities. Becoming part of this exciting new chapter of beverage history depends on you!

If you need more information about our Memory project you can visit our new website: www.memorysecret.net
